

Multidisciplinary designer in Austin, TX, with 8+ years of telling stories through visual design, motion and video. AI coding tools have become my favorite escape — they give me the freedom to build almost anything I can imagine. Claude Code anchors my workflow, and I orchestrate a wider set of tools around it to take ideas from first sketch to working product.

Experience

2025 – Now	Visa Senior Visual Designer	Austin, TX
	– Lead AI design technology, piloting new tools and setting how the org adopts them – Own prototyping, motion and video, and build AI tools that automate the work – Ship design pipelines and internal apps with Claude Code, in use org-wide	
2021 – 2025	AWS Motion Designer / Art Director	Seattle, WA
	– Art-directed motion and video for training, enablement and localization programs – Turned complex cloud and AI concepts into animated explainers used worldwide – Partnered with instructional designers, producers and subject-matter experts – Upheld AWS and Amazon brand and accessibility standards
