

Hi, I'm Jonathon — a multidisciplinary designer in Austin, TX, with 8+ years of telling stories through visual design, motion and video. AI coding tools have become my favorite escape — they give me the freedom to build almost anything I can imagine. Claude Code anchors my workflow, and I orchestrate a wider set of tools around it to take ideas from first sketch to working product.

Experience

2025 – Now	Visa Senior Visual Designer Lead AI design technology and tool adoption Own prototyping, motion and video Build AI tools that automate creative production Ship design pipelines and apps with Claude Code	Austin, TX
